

we need FAA to pay attention to the negative health effects to americans on the ground who never fly who can't breathe clean air because of aviation pollution, cant have any quality of life or a good night's sleep because of aviation noise and pollution and who cant feel safe in their own homes because of crash danger from drugged up pilots who are allowed to fly whenever they feel like it. We had a crash in Newark NJ not that long ago which wiped out many blocks so that they looked like a warzone, all because of a pilot on drugs who was allowed to fly. The maintenance on many planes is done in third world countries now so that there is little good work done, but low prices obtained so the planes are DANGEROUS. the faa IS SO FAR IN THE POCKET OF THE AVIATION INDUSTRY AND IS COMPLETELY FAILING IN ANY DUTY OR RESPONSIBILITY TO PROTECT THE AMERICAN PUBLIC FROM THE EXCESSES OF THIS INDUSTRY. faa has meetings where they don't even let the public express their anger at this government agency which is in the pocket of aviation money - it is absolutely disgusting what is being allowed by FAA. this is for the public record.
